

Roll Tarp for Grain Bag Loader

Fits all Loftness GBL's
S/N 52-147 & higher

from

The Agri-Cover Premium Tarping System exclusively for the Loftness GBL - Grain Bag Loader

Cover Your Profits Every Step of the Way

The Agri-Cover Roll Tarp is a premium **grain tarp** that works with you, not against you. Its unique tension system provides a steady and smooth roll in **all weather** conditions including **wind**, but has enough flexibility to allow easy rolling over uneven loads. The difference is in the details. From the weldless, rivetless **end caps** to the heavy-duty 18 oz. fabric, ACI manufactures roll tarps in the USA with quality components you can count on.

Roll Tarp Features

Roll It Open or Closed

Tarp takes only **seconds to operate** from the ground with no tie-downs. It remains secure during entire rolling operation, even in **windy** conditions.

Stores neatly in open or closed position. Roll tarp stores out of the way allowing you to fill from **either side** reducing risk of tarp damage from loaders.

Tensioning System

Flexible, Trouble-free Coupling

Telescoping Handle

Crank Handle Storage Location
