

Why Loftness?

WHY BUY A LOFTNESS GRAIN BAG SYSTEM?

- Designed and built in the United States for North American farmers, utilizing US components and workmanship.
- Speed up your harvest. Don't wait for trucks, the dryer or in elevator lines. Fill bags in the field and keep the combines moving.
- Fill bags from combine, grain carts or even semi-trucks.
- Expand the capacity of your existing grain handling system.
- Easily segregate your grain or seed by variety, moisture content, etc.
- Store wet corn before drying for increased harvest efficiency and reduced harvest time.
- It's suitable for keeping some kinds of pelleted materials such as alfalfa pellets, ground corn or urea inside a grain bag.
- It's a fraction of the cost of a grain bin set-up.
- There are no property taxes on the grain bag system or grain bags.
- Can be depreciated faster than grain bins.
- Store your grain in bags for about \$ 0.05 - \$ 0.07 per bushel.
- Eliminate elevator storage costs.
- Reduce your labor force; less trucks are required.
- Remove grain from bag after harvest when time is more abundant.
- Control your own marketing strategy.
- Easy to use, operator-friendly.
- Bag your crop at the rate of 26,000 bu/hr.
- Supported by local dealerships, backed by factory-trained technicians and local sales representatives.
- Fifty-three year company history with state-of-the art manufacturing facility.
